

NETWORKING & SYSTEM ADMINISTRATION LAB**Experiment No.:3****Name: Binu K Philip****Roll No: 43****Batch : MCA-R****Date :21-03-2022**

Aim :You are given a computer very low hardware resources it is to be used as a kiosk,identify and install a suitable linux distribution. You can stimulate in a virtual environment.

Procedure:**1. Virtualbox****a) Install Virtual machine****b) Virtual Machine Configuration****i. Click -> *New***

Click 'New' button to open a dialog

ii. Type a name for the new virtual machine

Example: ubuntu_binu

VirtualBox automatically changes 'Type' to Linux and 'Version' to 'Ubuntu '

Then click -> *next*

iii. Memory:-

The memory size depends on your host machine memory size.

In my case i choose 2 GB from my harddisk.

iv. Click next 3 'next' button and last 'create' button.

Accept the default 'Create a virtual hard drive now' and click 'Create' button.

Continue to accept the default 'VDI' drive file type and click 'Next' button

Change the storage type

VirtualBox will generate Ubuntu virtual machine

v. Ubuntu installing:-

Now the virtual machine is created. We are ready to install

Ubuntu in this virtual machine. Select your new virtual machine and click '**Settings**' button. **Click on 'Storage'** category and then '**Empty**' under Controller:IDE. Click "CD/DVD" icon on right hand side and select the ubuntu ISO file

Click **ok** to continue

Then we have two option **1, Try Ubuntu** and **2,install Ubuntu**
Select second option install Ubuntu

Click install now

Choose your location. Then click continue

Then select language and continue

In dialog, enter your preferred name, username and password

Click continue...

installation will continue until it is finished

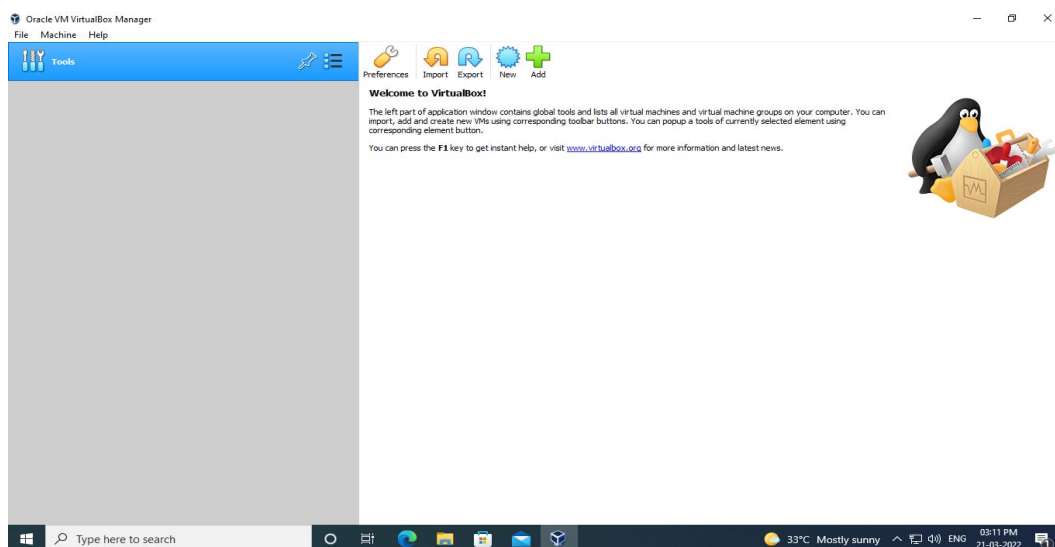

vi. Sign to Ubuntu.

Enter the password you have chosen and press 'Enter'

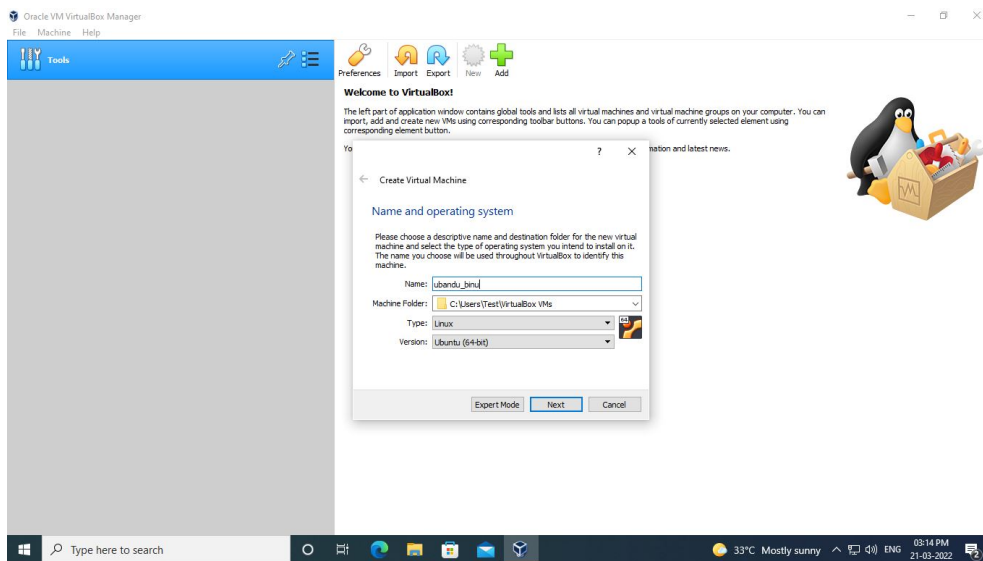

Now the Ubuntu OS is Ready.
